INTRODUCTION

The Barcode Generation system is a web application developed for Bata Ltd. to efficiently generate the PDF barcodes for Boxes to be packed and dispatched.

The application allows users to generate the barcode for the existing article number of the manufacturing and the vendor user and get the label printed for the same. The File Generation screen allows the user to create the new and existing barcode request. The Approval screen allows the user to approve the request for barcode label data. Then only the barcode can be generated in the PDF format. The report can be downloaded for the dates for the article number barcode printed as per user selection from the Calendar.

WEB APPLICATION LOGIN

To access the web application, enter the hosted URL ([i.e. local host:53316](#)) of the web application in any client browser. On browsing, following Login screen will appear

1. Enter Shop Number, User ID and Password.

2. Click on **Login**. The system will authenticate the entered User Id and Password.

** In case of wrong User Id and Password, an error message will be displayed.*

Close

1. Click on **Close** to exit the application.

FILE GENERATION

GENERATE BARCODE

This module is used to generate number barcode for user. Click on **Generate New Barcode** from the selection option following screen will get displayed.

Barcode	ARTICLE	GLOBLE_EAN	MRP	APPROVED	CREATE_ON
